COMPLIANCE POLICY STATEMENT

Spector & Co. takes the safety of its products very seriously. We developed a rigorous internal and external safety testing system to ensure the conformity of all our products with all applicable national and local legal requirements, customs and published industry standards.

Under the supervision of the Compliance Department our China office coordinates the testing and inspections of goods with our internal staff and 3rd party companies.

Spector & Co. believes in and supports supply chain systems based on sustainable operations with all its business partners. We aim to deliver the highest standards of safety for our products and are continually working to create and maintain a network of socially and environmentally responsible suppliers.

Spector & Co. is always striving to find new ways to improve the current supply chain system and create a better tomorrow. We voluntarily perform a 4 pillar SMETA audit, Eco-Vadis and an FSC chain of custody audit on a yearly basis. Having an independent review of our processes allows us to ensure that we are bringing value to our clients and the supply chain that links us all.

If you have any questions related to our Policies and Procedures, please feel free to contact our Compliance Department at compliance@spectorandco.com
